

Ex. No: 1**Print the Given String****PROGRAM:**

```
import java.util.Scanner;

public class Str1 {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine();

        System.out.println(str);

        sc.close();

    }

}
```

Ex. No: 2**Find the Length of a String****PROGRAM:**

```
import java.util.Scanner;

public class StringLength {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a string : ");

        String str = sc.nextLine();

        int length = str.length();

        System.out.println("Length of the string is : " + length);

        sc.close();

    }

}
```

Ex. No: 3**Convert to Uppercase****PROGRAM:**

```
import java.util.Scanner;

public class StringUpperCase {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a string : ");

        String str = sc.nextLine();

        System.out.println(str.toUpperCase());

        sc.close();

    }

}
```

Ex. No: 4**Convert to Lowercase****PROGRAM:**

```
import java.util.Scanner;

public class StringLowerCase {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a string : ");

        String str = sc.nextLine();

        System.out.println(str.toLowerCase());

        sc.close();

    }

}
```

Ex. No: 5**Print First Character****PROGRAM:**

```
import java.util.Scanner;

public class StringFirstCharacter {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a string : ");

        String str = sc.nextLine();

        System.out.println("Last Character = " + str.charAt(0));

        sc.close();

    }

}
```

Ex. No: 6**Print Last Character****PROGRAM:**

```
import java.util.Scanner;

public class StringLastCharacter {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a string : ");

        String str = sc.nextLine();

        System.out.println("Last Character = " + str.charAt(str.length() - 1));

        sc.close();

    }

}
```

Ex. No: 7

Count Total Vowels

PROGRAM:

```
import java.util.Scanner;

public class StringTotalVowels {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine().toLowerCase();

        int count = 0;

        for (int i = 0; i < str.length(); i++) {

            char ch = str.charAt(i);

            if (ch == 'a' || ch == 'e' || ch == 'i' || ch == 'o' || ch == 'u') {

                count++;

            }

        }

        System.out.println("Vowels = " + count);

        sc.close();

    }

}
```

Ex. No: 8

Count Total Consonants

PROGRAM:

```
import java.util.Scanner;

public class Main {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine().toLowerCase();

        int count = 0;

        for (int i = 0; i < str.length(); i++) {

            char ch = str.charAt(i);

            if (ch >= 'a' && ch <= 'z') {

                if (ch != 'a' && ch != 'e' && ch != 'i' && ch != 'o' && ch != 'u') {

                    count++;

                }

            }

        }

        System.out.println("Consonants = " + count);

        sc.close();

    }

}
```

Ex. No: 09**Reverse the String****PROGRAM:**

```
import java.util.Scanner;

public class StringReverse {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine();

        for (int i = str.length() - 1; i >= 0; i--) {

            System.out.print(str.charAt(i));

        }

        sc.close();

    }

}
```

Ex. No: 10**Check Palindrome String****PROGRAM:**

```
import java.util.Scanner;

public class StringPalindrome {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine();

        String rev = " ";

        for (int i = str.length() - 1; i >= 0; i--) {

            rev += str.charAt(i);

        }

        if (str.equals(rev)) {
```

```
        System.out.println("Palindrome");
    } else {
        System.out.println("Not Palindrome");
    }
    sc.close();
}
}
```

Ex. No: 11 **Count Spaces**

PROGRAM:

```
import java.util.Scanner;

public class StringCount {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine();

        int spaces = 0;

        for (int i = 0; i < str.length(); i++) {

            if (str.charAt(i) == ' ') {

                spaces++;

            }

        }

        System.out.println("Spaces = " + spaces);

    }

}
```

Ex. No: 12**Replace Spaces with Hyphen****PROGRAM:**

```
import java.util.Scanner;

public class StringHyphen {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine();

        String result = str.replace(' ', '-');

        System.out.println(result);

    }

}
```

Ex. No: 13**Count Words****PROGRAM:**

```
import java.util.Scanner;

public class StringCountWords {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str = sc.nextLine().trim();

        if (str.isEmpty()) {

            System.out.println("Words = 0");

        } else {

            String[] words = str.split("\\s+");

            System.out.println("Words = " + words.length);

        }

    }

}
```

Ex. No: 14

Compare Two Strings

PROGRAM:

```
import java.util.Scanner;

public class StringsEqual {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str1 = sc.nextLine();

        String str2 = sc.nextLine();

        if (str1.equals(str2)) {

            System.out.println("Strings are Equal");

        } else {

            System.out.println("Strings are Not Equal");

        }

    }

}
```

Ex. No: 15

Concatenate Two Strings

PROGRAM:

```
import java.util.Scanner;

public class StringConcatenate {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        String str1 = sc.nextLine();

        String str2 = sc.nextLine();

        String result = str1.concat(str2);

        System.out.println(result);

    }

}
```
